WORK EXPERIENCE

Full Stack Developer

APR 25 - Present

AlphaBeta Solution, Mumbai

- Developed and deployed a full-stack AI-powered pet care web application featuring an AI Vet chatbot, AI-based pet portrait generation, and injury scanning/report analysis functionalities.
- Integrated multiple AI models and APIs for conversational assistance, image generation, and medical report analysis, ensuring seamless backend-to-frontend functionality.
- Implemented secure end-to-end payment processing using the Stripe payment gateway, including subscription and transaction handling for live production deployment.
- Managed complete frontend and backend development, including bug fixing, UI/UX enhancements, performance optimization, and continuous feature upgrades for live web applications.

Founding Software Developer

DEC 25 - Mar 25

The Artonaut, Mumbai

- Sole full-stack developer for the company's flagship AI platform, extending an existing Supabase + Cloudflare stack by designing and building major product features, workflows, and database updates.
- Integrated 21+ AI model APIs by creating a unified payload abstraction layer and adapter logic for different model specifications, enabling seamless multi-model image generation in a single interface.
- Designed and developed a full image editing suite (expand, crop, upscale, visual edit) while maintaining token tracking, image history, and request-based processing pipelines.

Data Automation Engineer Mystic

APR 25 - JUL 25

Panels and Planks, Mumbai

- Built internal dashboards using HTML, CSS, and JavaScript, improving data visibility and enabling 30% faster team reporting.
- Automated lead qualification and internal workflows using Google Apps Script, SQL, and GCP, creating data pipelines and integrations (Tally Prime → Google Sheets) that improved lead quality by 10%.

PROJECTS

TRAFFIC-O-METER

Technologies: React, Python, FastAPI, OpenCV, YOLO, REST APIs

- Built a traffic monitoring prototype with a React dashboard and FastAPI backend, enabling live traffic insights through video stream processing and interactive visualisation.
- Implemented vehicle detection and traffic density analysis using YOLO and OpenCV, exposing REST APIs and applying modular, asynchronous backend architecture for scalable data processing.

URBAN PULSE

Technologies: MERN Stack, Cloudinary, leaflet

- Engineered a full-stack smart city platform enabling users to submit and geotag urban issues with images, featuring interactive maps (Leaflet) for issue tracking, filtering, and spatial visualization.
- Built RESTful APIs and a role-based admin dashboard designed for government workflow integration, ensuring secure, scalable, and auditable issue management with high-concurrency support.

TECHNICAL SKILLS

Languages: HTML, CSS, Javascript, Basics of Java and Python, Appscript, MySQL(basic), Typescript

Front-end technologies: React.js, HTML, CSS, Javascript(ES6), Tailwind CSS (basic), Next.js

Back-end technologies: Node.js, Express.js, FastAPI

Databases: MongoDB, PostgreSQL(basic), mysql(basic), supabase

Devops and tools: Git, VS code, Vite, Npm, Google Big query, Google cloud platforms, cloudflare

EDUCATION

Bachelor of Computer Engineering

Atharva College Of Engineering

2022-2026

CGPA - 7.8/10 till now
